

Agriculture

Before the Electronic Databases

Searching the Early Print Literature

What are the print precursors to the AGRICOLA Database?

Experiment Station Record
U.S. Office of Experiment Stations
1889 - 1946

Call Number - Z5071.U7

Bibliography of Agriculture
National Agricultural Library
1942 - 1969

Call Number - Z5071.U63

AGRICOLA
Database
National Agricultural
Library
coverage:
1970-current

Selected journal & abstract coverage preceding the CAB Database:

Pre-CAB Print Coverage: 1922 - 1996

Horticultural Abstracts - 1931 - 1996
Call Number - SB4.I5

Review of Plant Pathology- 1922 - 2003
Call Number - SB599.R37

Formerly Review of Applied Mycology
Call Number - SB599.R37

Also:

Field Crop Abstracts - Call Number: SB183.C6

Plant Breeding Abstracts - SB123.I6

Weed Abstracts - SB611.A1 W4

**Bibliography of Soil, Science, Fertilizers
& General Agronomy - S590.I23**

CAB
(CAB International)
Database
1972-current

What preceded the BIOSIS Previews Database?

Pre-BIOSIS Print Index Coverage: 1926 - 1993

Biological Abstracts
1926 - 1993

Call Number - QH301.B5

BIOSIS Previews
Database
1969-current

TASK: Searching the Early Literature for Pierce's Disease

Identify any early terms or related keywords: Use these terms when searching the print indexes. e.g.: mysterious disease, California vine disease, California disease, vine plague, Anaheim disease, Pierce's disease, xylella fastidiosa bacterium, N.B. Pierce (use variations), vector, leafhopper, glassy winged sharpshooter.

Using the 10 Year Print Indexes for Experiment Station Record

Call Number: Z5071.U7

Using the index for Volumes 41-50 (1919-1924)

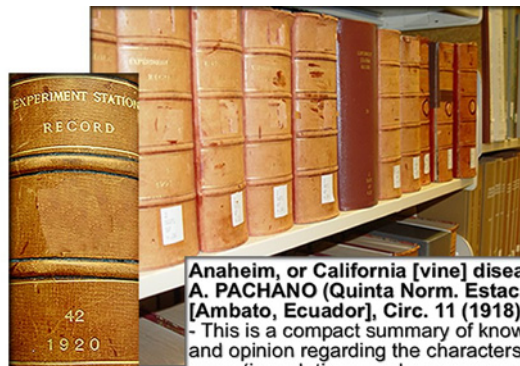

Indexed terms:

Grape - California disease

California disease, (42) 49.

Volume (42) page 49

Anaheim, or California [vine] disease, Expt. [Ambato, Ecuador], Circ. 11 (1918), of known facts and opinion regarding the management of the so-called California disease. Grape disease, R. AVERNA-SACCÁ (Bol. (1918), pp. 214-220, figs. 3).—Two forms of

Anaheim, or California [vine] disease, A. PACHANO (Quinta Norm. Estac. Expt. [Ambato, Ecuador], Circ. 11 (1918), pp.8). - This is a compact summary of known facts and opinion regarding the characters, causative relations, and management of the so-called California disease of grape.

Locating the Journal or Serial Title in the Harvest UC Davis Library Catalog or Melvyl

Harvest UC Davis Library Catalog Example: search for the journal or serial title (not the article)

Full View of Record

Choose format: Standard format MARC tags

Record 2 out of 2

Author: Quinta Normal de Ambato. Estacion Experimental.

Title: **Circular.**

Published: Ambato

Record format: Serial

Availability: All items

Call no.: Northern Regional Lib Facility S197 .E3

Note: Issues from several different sections of the Experimental Stations.

Subject: Agriculture -- Ecuador.

Some of the older records are difficult to retrieve due to the generic titles, as in the case of this publication. Ask a reference librarian for assistance locating such items.

In Harvest, use keywords from citation such as title of journal, the corporate author or publisher.

Select the **Keywords Anywhere Search**.

Use the truncation symbol (*) to pick up abbreviated terms in the original citation:

quinta norm* estac*

In Melvyl Catalog: the keyword search does not pick up the author, so use the publisher's name 'Ambato'

Interlibrary Loan: use the electronic form or the Request Function

Requesting the article via the electronic Interlibrary Loan form (desktop delivery or print)

UC-eLinks

Article Book Chapter

Include as much information as possible. Journal title OR ISSN AND date required.

Article Title: Anaheim, or California [vine] disease

Journal Title: Circular

Publisher/Place of publication: Ambato Ecuador

Date: 1918

Season: [dropdown]

Volume: 11 Issue: []

Page Range: 8 e.g., S127-S145

ISSN: [] Other Number: []

Last name First name Initials

Article Author: Pachano A
